ABOUT ME

Hi there! I am Emmanuel! You might also know me as Rapoo. I've been coding for over 4 years now. As a Full Stack developer. good with React-Js, Typescript, Laravel and MySQL. I've worked with startups and large corporations to help build & scale their companies. Along the journey I realised my passion existed in helping others excel and pursue their dreams as upcoming developers and most especially love building new ideas on different projects. With this passion, I have now built many projects and still working on building much more projects. I deliver REAL VALUE by teaching REAL WORLD projects to help students enter the world of web development. You'll get hands-on experience and learn the skills that are required to succeed in the real-world and enjoy wonderful sites and applications built and delivered right on Time
